

LUMI *IML Click & ViewPoint*

Turn every presentation, meeting or training session into a valuable working experience.

Your presentation, now interactive.

ViewPoint combined with the IML Click is the most intuitive and user-friendly PowerPoint voting system available. With the click of a button, you can turn a standard PowerPoint slide into an interactive question. Gain real measurements of knowledge transfer and retention in minutes—not months. ViewPoint also offers one-click exporting to Excel, just click the 'Create Reports' button to view all of the valuable data you just collected.

Easy, effective and efficient communication made possible with ViewPoint and IML Click.

Communicate complex ideas with the click of a button.

MULTI-ANSWER AND RANKING QUESTIONS

Audiences may vote for as many choices as they like where answers are of equal importance. You can also let your audience collaborate in key business decisions by ranking their highest priority choices.

USER REGISTRATION AND TRACKING

ViewPoint includes easy user tracking and registration. You can create or import a list of all your attendees to track participation over time and ensure each individual is meeting your key objectives.

QUIZ SCORING AND SCOREBOARDS

Track knowledge retention, certify learning or invite a little friendly competition to your meeting. ViewPoint allows you to create scoreboards in seconds. Increase the competitiveness of your quiz with speed scoring—the faster you answer, the more points you receive! Scores can be broken down by teams or individually, all within a matter of seconds. Then, use PowerPoint to style and animate your scoreboards to fit your meeting theme.

FREE TO DISTRIBUTE LICENSE

ViewPoint is completely free to distribute. As long as you have a registered IML Click receiver, anyone in your group can enjoy the benefits of ViewPoint and IML Clicks.

DATA STORAGE AND REPORTING

All data is safely stored in the Lumi database allowing results to be analyzed and shared after the event. Whether you're interested in the high level overview of your meeting or want to get to the finest level of granularity, it's all there.

ADVANCED ANALYSIS

Gain perspective on your results. ViewPoint's analysis features allow you easily analyze results during or after your meeting.

- ▶ **Demographic Split:** Learn what insight exists across various segments. Simply split voting results into a variety of demographics—like gender, region, age or any other characteristic of interest.
- ▶ **Compare:** Ask a question to establish a baseline, and after the presentation, ask the same question again—both sets of results are shown instantly, making it easy to gauge progress.
- ▶ **Recall:** Revisit any polling question at any time throughout your presentation to highlight previous results or to view results you chose to hide the first time around.
